

WEEK TWO

INTRO

Before starting Week 2, read this short introduction.

Think about how complex we are as humans. You can look at someone on a purely surface level and agree that humans are pretty awesome. Eyes that see. Fingers that bend. Joints. Teeth. And so on. Pretty cool stuff, right? Human beings are a marvel. But that's just the surface. Think about all the complexities under the skin. Muscles. Nerves. A Circulatory system that keeps everything going. A brain that controls it all. Kind of mind-blowing if you think about it for too long. And yet, you could go even deeper! You could examine the cells, enzymes, even the bacteria and find a level of complexity that's almost impossible to grasp. The human body is wonderfully complex.

Want to know something? As complex and amazing as the human body is, God is about a million times more complex. There is so much to God! We could spend the rest of eternity trying to understand His nature and still not be able to take it all in. And yet, He still allows us to be in a relationship with Him, something that is ALSO incredibly mind-blowing.

Last week we laid the foundation for your look at the Darkness and the Light. This week we're going to take a deeper look at how the Bible describes God as light and what that means. It's just one of the many, many ways we can think about who God is. You're going to see God and how He interacts with you in a new way. Hopefully, you'll understand a new side to God that maybe you haven't processed before.

Ready? Let's go.
